

Middle-head: data centroid (warm start) vs learned mean after training

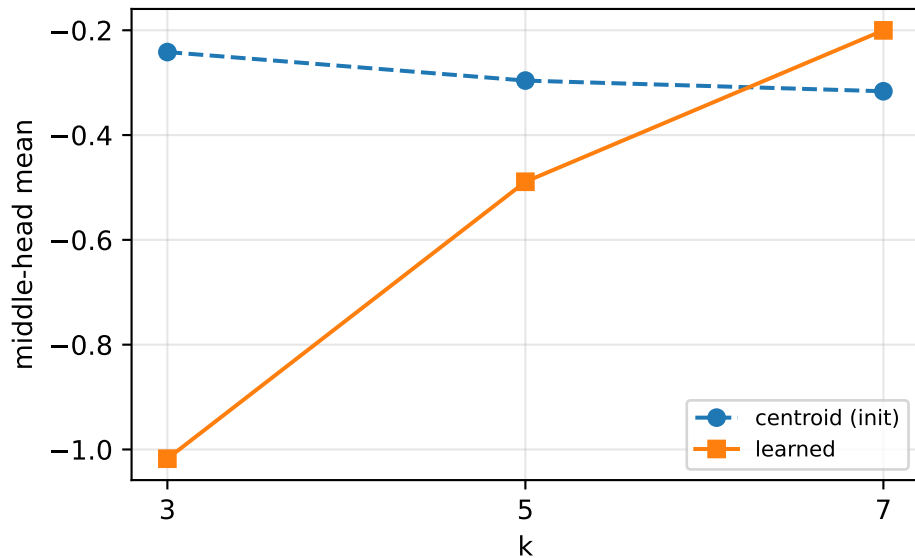

heteroscedastic

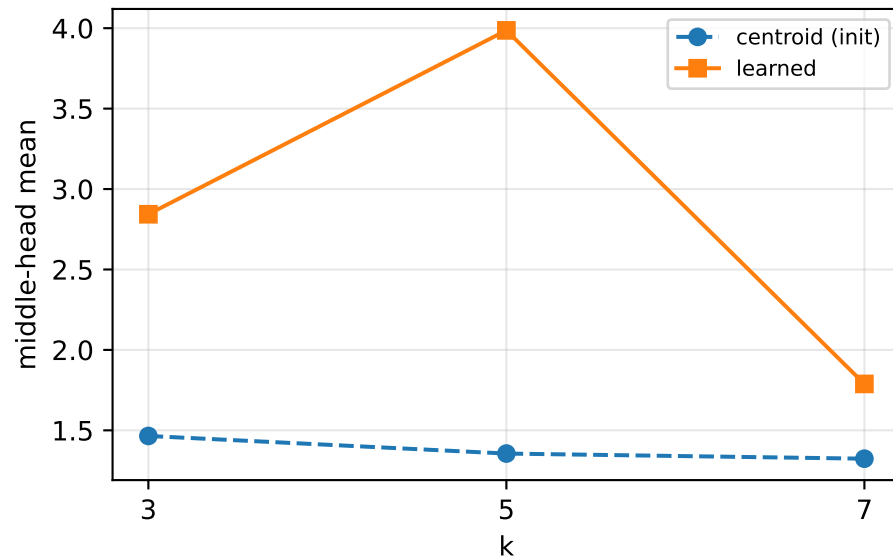

bimodal

piecewise

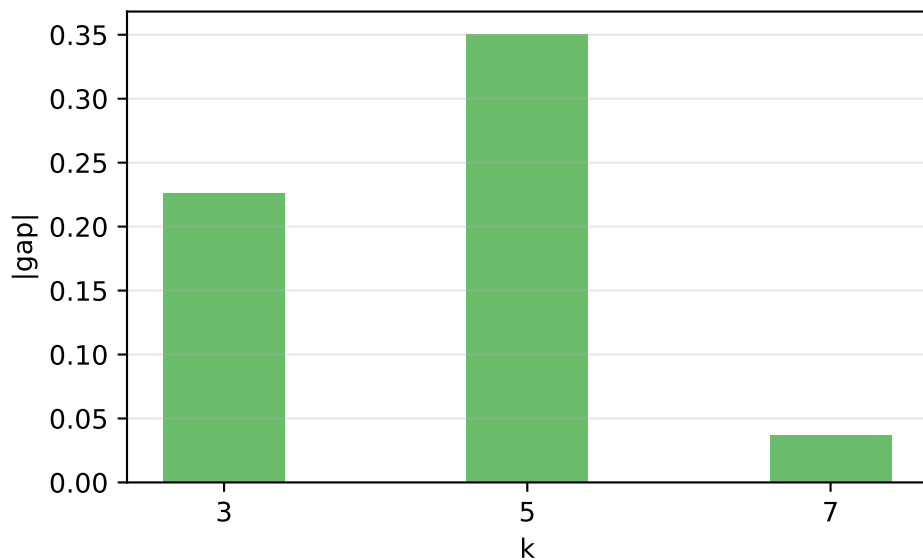

exponential

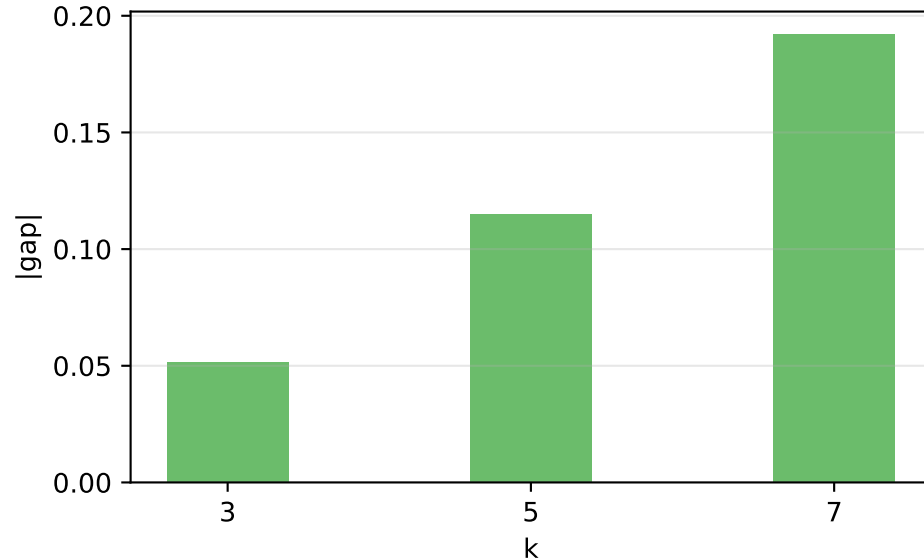

Gap = $|\text{learned_mean} - \text{data_centroid}|$ after training

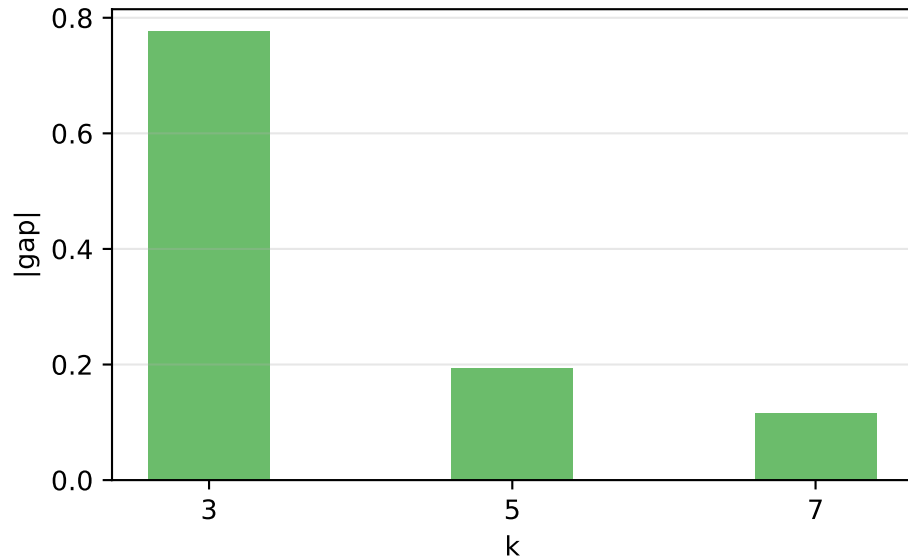

heteroscedastic

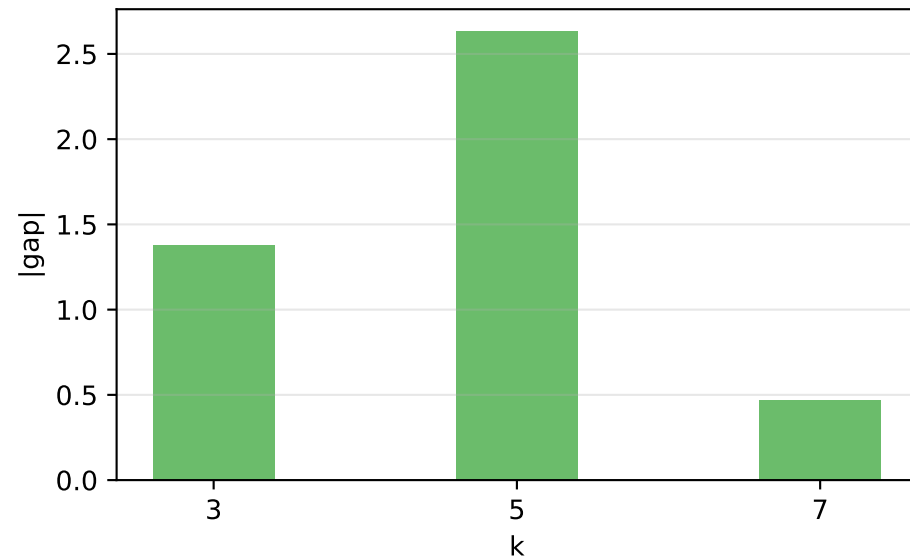

bimodal

piecewise

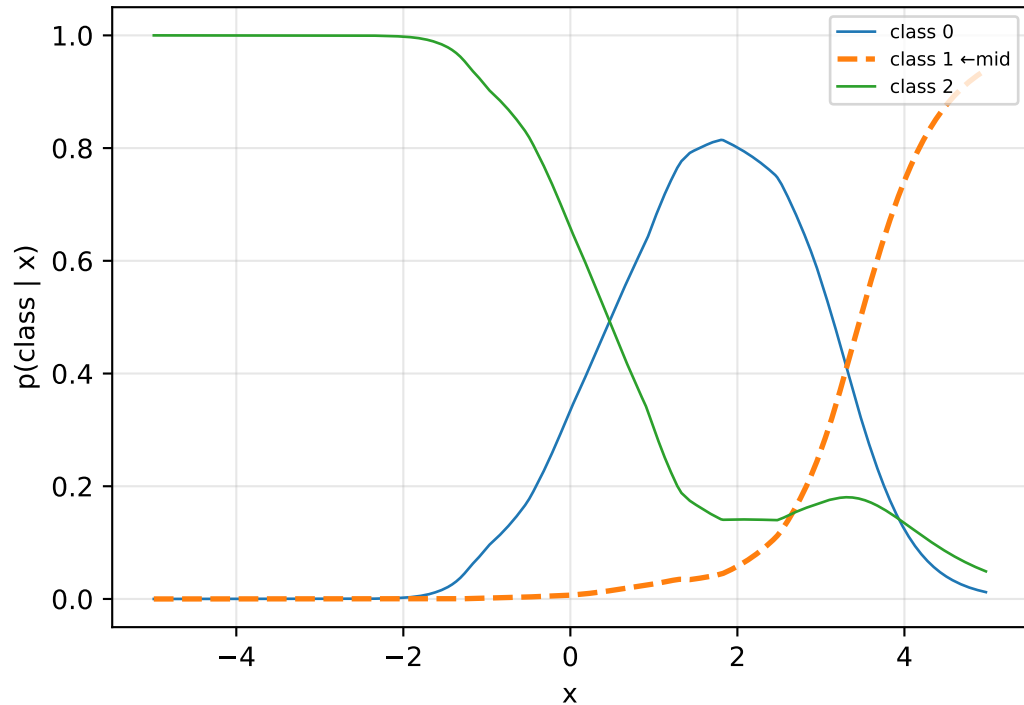

exponential

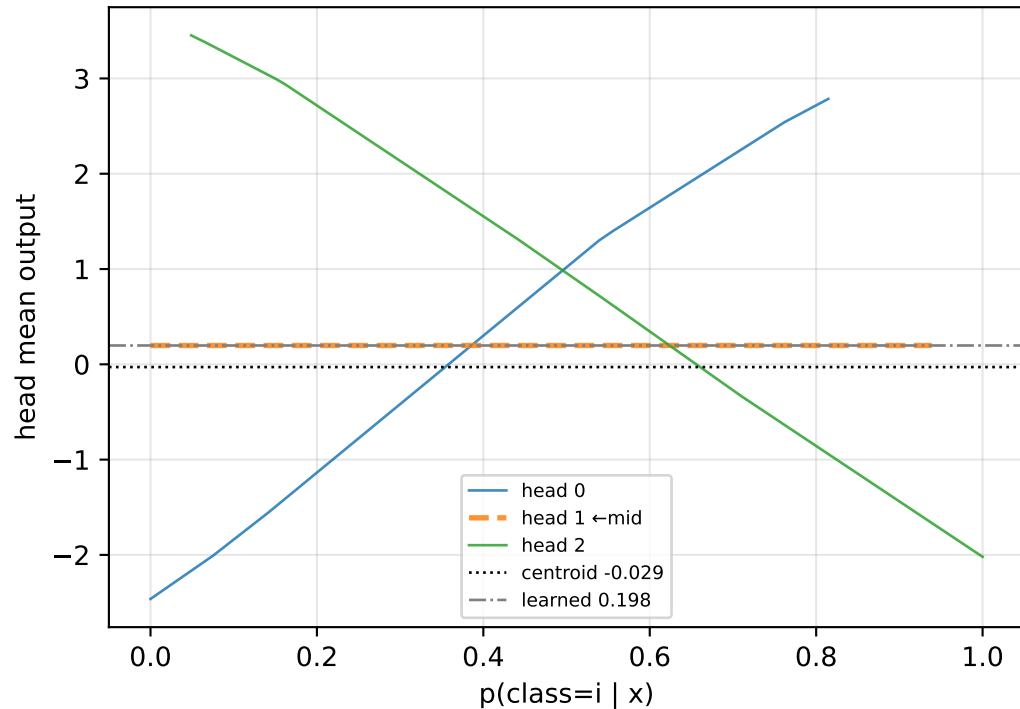

heteroscedastic k=3 | middle head idx=1

Classifier probabilities vs x

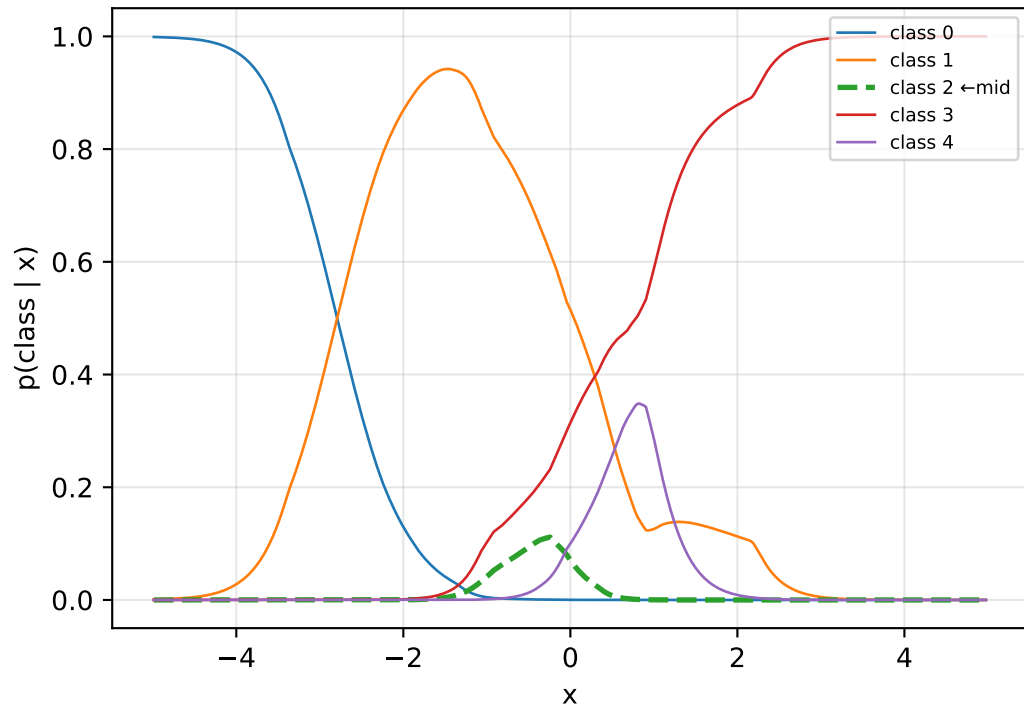

Regression head mean vs class probability

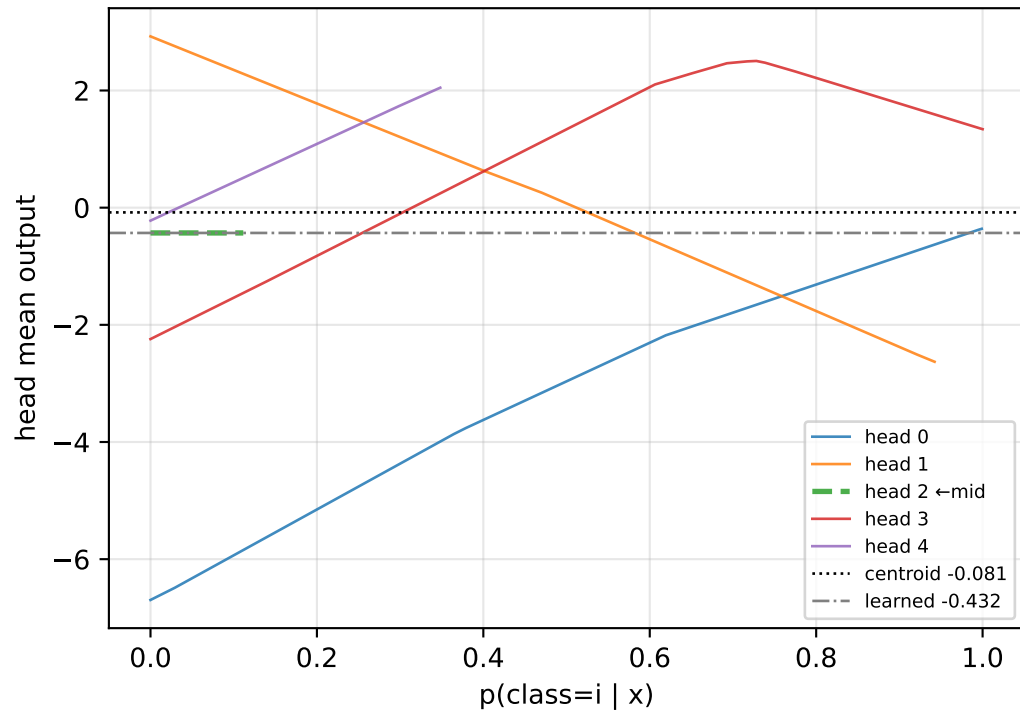

heteroscedastic k=5 | middle head idx=2

Classifier probabilities vs x

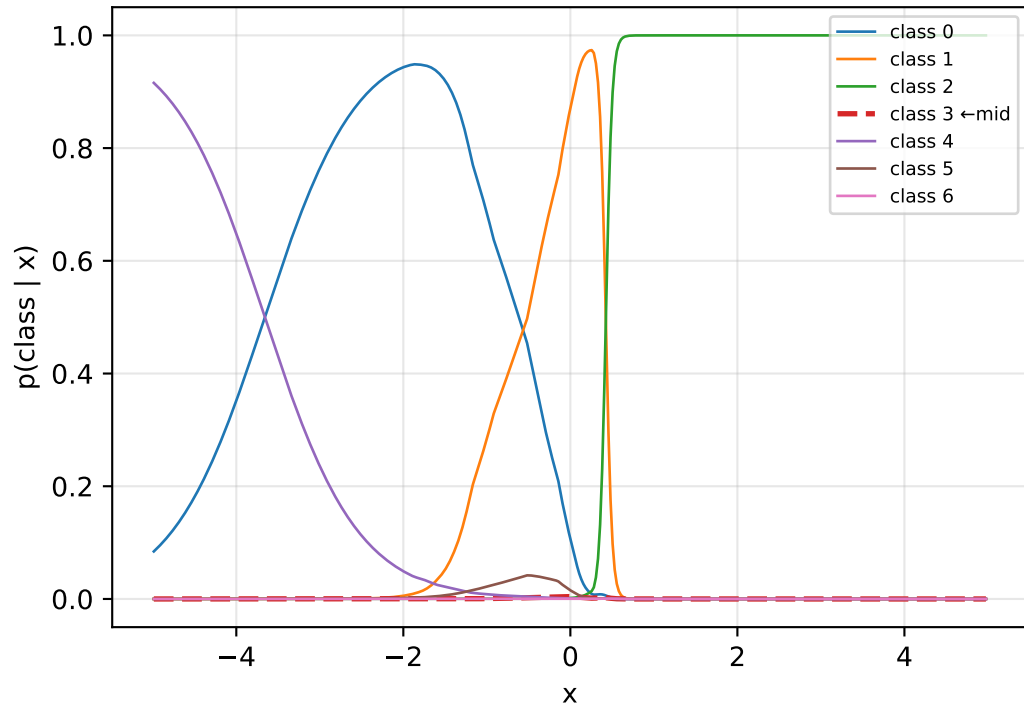

Regression head mean vs class probability

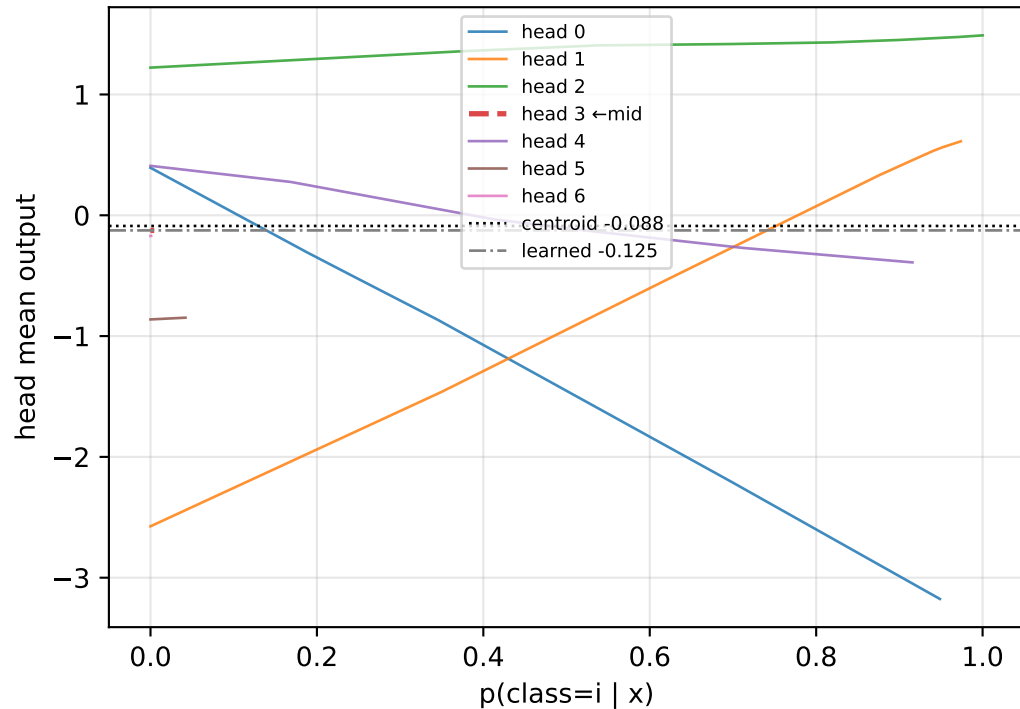

heteroscedastic k=7 | middle head idx=3

Classifier probabilities vs x

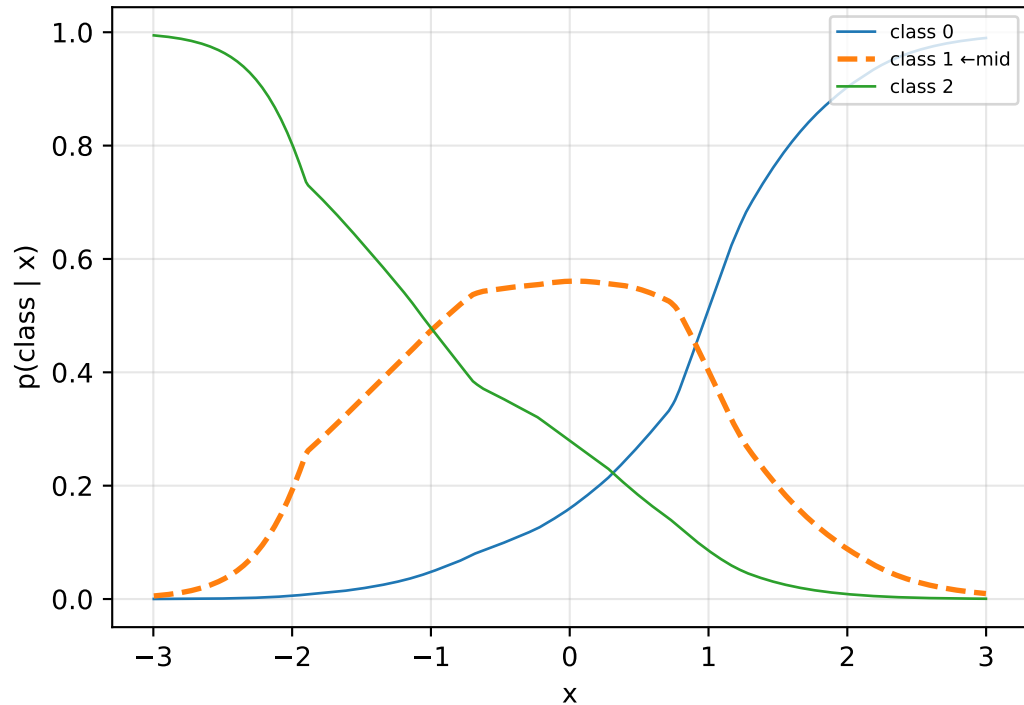

Regression head mean vs class probability

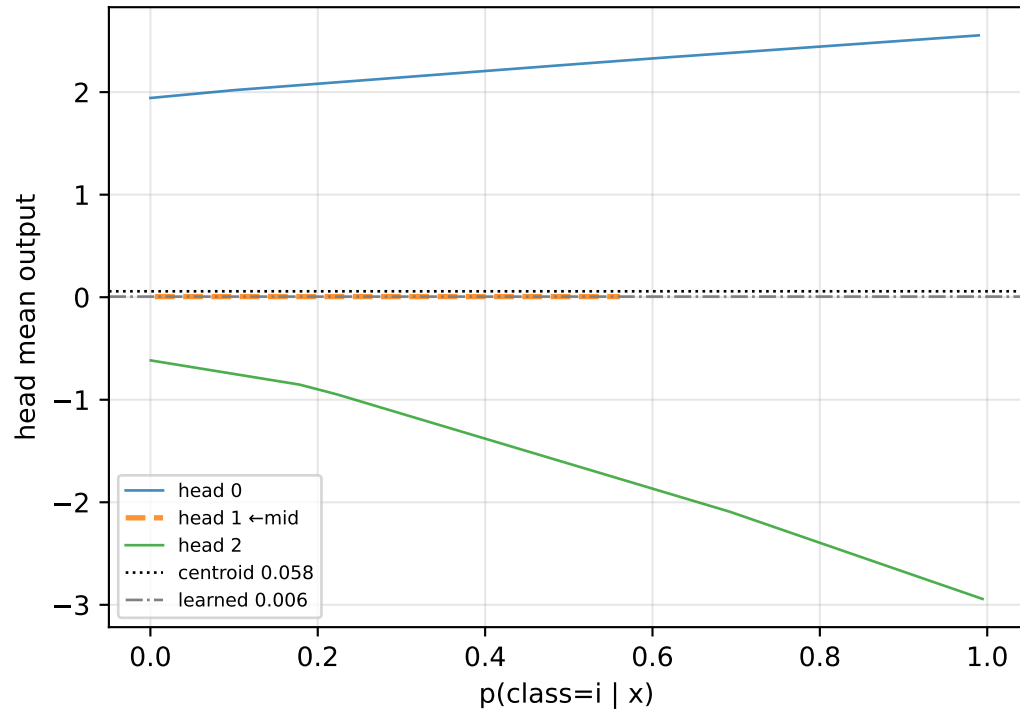

bimodal k=3 | middle head idx=1
